Calgary 10th April 1918-F

Sir:

The attached prints No 19 and 20 is an attempt to show graphically the results, in the Province of Manitoba, Saskatchewan and Alberta, of the Census of June 1918 in the matter of population - Urban and Rural Population - the four leading cereals; the same number of the leading classes of stock; Railway mileage; Farm units. Also the density of Rural population.

No 19- Devoted to population and the arrangement is as follows. 1st - Federal Constituencies arranged in alphabetical sequence showing the Province within which each is located. Regarding other data the sequence is based on the output; number; value, etc. In the latter, by referring to the first; one readily ascertains in which Province the Constituency is located. Further the location of the Constituency in the said Province can be ascertained by referring the number of the constituencies in 20 to the alphabetical list of constituencies in its upper left-hand corner.

No 20- Intended to show at a glance the relative density of Rural population in the three Provinces. A reference to the legend on same will show practically the population in any township; arrived at by multiplying the number per square mile by 36.

It is trusted the information in said prints will prove of interest and value.

Respectfully Submitted,
William Pearce

Calgary 10th April 1918-F

Sir:

The attached prints No 19 and 20 is an attempt to show graphically the results, in the Province of Manitoba, Saskatchewan and Alberta, of the Census of June 1918 in the matter of population - Urban and Rural Population - the four leading cereals; the same number of the leading classes of stock; Railway mileage; Farm units. Also the density of Rural population.

No 19- Devoted to population and the arrangement is as follows. 1st - Federal Constituencies arranged in alphabetical sequence showing the Province within which each is located. Regarding other data the sequence is based on the output; number; value, etc. In the latter, by referring to the first; one readily ascertains in which Province the Constituency is located. Further the location of the Constituency in the said Province can be ascertained by referring the number of the constituencies in 20 to the alphabetical list of constituencies in its upper left-hand corner.

No 20- Intended to show at a glance the relative density of Rural population in the three Provinces. A reference to the legend on same will show practically the population in any township; arrived at by multiplying the number per square mile by 36.

It is trusted the information in said prints will prove of interest and value.

Respectfully Submitted,
William Pearce

AN PACIFIC RAILWAY COMPANY

COLONIZATION AND DEVELOPMENT BRANCH

J. S. DENNIS
CHIEF COMMISSIONER

COMPILED BY W. PEARCE
Calgary 15th March 1918

Census June 1916

owing by Federal Constituencies, Annual Output, Grain, Stock, Cultivated Land, Lands open for entry etc. etc.
There are 43 Federal Constituencies in the 3 Prairie Provinces. The rank locates the subject treated for the whole of the said Provinces.

Annual Output — Annual Output is arrived at as follows, being the sum of the No of bushels of Wheat multiplied by $.905 for Man. $.86 for Sask and $.814 for Alta.
Oats multiplied by $.353 for Man $.328 for Sask and $.303 for Alta) Barley " " $.306 " " $.468 " " $.43 " "
Flax " " $1.608 " " $1.568 " " $1.518 " "
25% of the No of Horses multiplied by $100.00 ; 25% of the No of Cattle multiplied by $ 42.00 ;
50% " " " Sheep " " $8.50 ; 80% " " " Pigs " " $ 11.00 assumed value of each in dollars
The value of Grain is taken from Census Estimate for Manitoba, allowing 7.5 per hundred as extra freight charge for Sask points and 15 " " " " " " " Alta " " to Fort William.

Annual Output (3)
